

Summary

Product Manager with 4+ years of experience in B2B SaaS, specializing in Product-Led Growth, AI-driven automation, and Technical SEO. Proven track record of improving acquisition, retention, and operational efficiency through data-driven product decisions. Looking to drive scalable growth in a high-impact product team.

Experience

Tracxn Technologies – Program Manager [Product Manager Scope] (Jan 2025 – Present)

- Owned Tracxn Lite roadmap end-to-end – synthesised user research, competitive benchmarking, and sales signal to author PRDs and define GTM strategy; deprioritised two in-flight features to focus on self-serve acquisition, driving 35% signup growth.
- Identified hallucination failures in legacy AI pipeline; designed and validated its replacement: a 5-stage, multi-model RAG pipeline on Vertex AI with per-step inference tuning (model selection, temperature) and a fact-checking validation layer – achieving zero factual errors across 2,000+ consecutive articles while publishing 5–30 briefs daily.
- Diagnosed low feature adoption using Hotjar heatmaps and product usage data; redesigned dashboard sidebar with tier-based personalised product widgets, driving 10% feature adoption lift within 2 weeks, including 18% growth in Chrome extension installs and 27% in newsletter signups.
- Introduced Product, Brand, NewsArticle, and FAQ schema across millions of URLs; drove 40% impression growth and improved average position from 13.5 to 6.5, while expanding AI Overview and LLM citation eligibility.
- Pushed back on a stakeholder proposal to deploy 8 near-identical buy widgets across 3.5M SEO pages, same checkout link, duplicate copy, risking a scaled-content penalty; built a UX, SEO, and comps-backed case for a consolidated widget, lifting indexing 21%, ranking 15%, and checkouts 8%.
- Launched multi-geo LLM-driven newsletter workflows with automated localised content delivery; new newsletters outperformed all existing ones – achieving 3x subscriber growth and a 48% read rate against a 15% baseline average.
- Architected trigger-based MIS dashboards in Looker Studio with automated bulk API data fetching; reduced stakeholder reporting lag from 1 day to real-time, enabling CXOs to make decisions on live product health data.

Apple (via Adecco) – Content Ops Specialist (May 2022 – Dec 2024)

- Led end-to-end migration of ~100,000 articles from a third-party database to an internal system – defined data format requirements, designed the migration workflow, and managed resources; built an automation script that delivered the migration in 1.5 months against a 3-month timeline.
- Automated recurring data workflows using Python, reducing manual processing time by 40% and increasing data accuracy.
- Performed root cause analysis to identify data anomalies and enhanced the data extraction process, reducing manual effort by 30%.
- Led a team of 10 in defining KPIs with stakeholders and building Tableau dashboards that converted complex data into actionable insights, directly tracking progress against business goals.

Core Skills

- **Product & Growth:** E2E Lifecycle, Agile/Scrum, GTM Strategy, PRD Authorship, RICE Prioritization, Stakeholder Alignment, Cross-Functional Leadership.
- **AI & Cloud:** Vertex AI, Gemini, RAG & Grounding Architecture, Multi-Model Pipeline Design, Prompt Engineering, Inference Tuning (Model Selection, Temperature), Google Cloud Platform.
- **Growth & Discovery:** A/B Testing, Behavioral Segmentation, Competitive Intelligence, Retention Optimization.
- **Data & Analytics:** Looker Studio, Tableau, SQL, GA4, API Integrations, Multi-Geo Lifecycle Marketing.
- **Technical SEO:** Schema Markup, Crawl Budget Optimisation, GSC, SEO Automation.

Education

- Masters in Computer Application – Data Science - 8.9 CGPA | 2025
Jain (Deemed to be University) - Bangalore
- Bachelor of Science – Computer Science, Mathematics & Electronics - 8.29 CGPA | 2021
Christ (Deemed to be University) - Bangalore

Certifications

- Neural Networks & Deep Learning – DeepLearning.ai
- Complete SQL Bootcamp – Udemy
- Tableau (Advanced) – Udemy
- Basic Statistics – Coursera
